SUPPLEMENT TO
REPORT NO.

25X1X

1. A Soviet commission composed of two generals, accompanied by General Romniceanu, of the Rumanian Air Force, recently inspected the reconstruction work at the Duzau airfield. This commission inquired into the length of time required to finish the reconstruction of this field, which was badly damaged during the war, and ordered that the work be completed with all possible speed.
2. The gasoline storage tanks of the Duzau airfield, with a capacity of 300,000 liters, are located underground and are protected by heavy reinforced concrete. The Soviet authorities have ordered that this reinforced concrete be further strengthened.
3. This airport is served by the Boboc railroad station which is situated on the edge of the field.
4. The airfield at Braila is reportedly under the sole control of the Russians, no Rumanians being permitted access to it.
